GETH WALLET
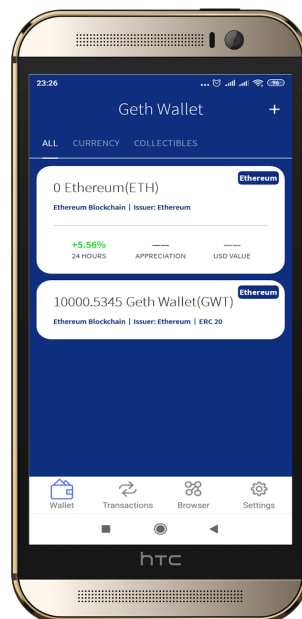

Secure Ethereum Assets Wallet

LITEPAPER

Version 1.0

INTRODUCTION

Geth wallet is a secure ethereum asset wallet with a dapp browser that aims to provide both secure means of storing ethereum, erc20 and collectibles both onchain and offchain.

We also provide Ethereum developers Resources that help Eliminate the need to own dedicated wallet, simply integrate any Ethereum Dapp to run natively inside our wallet.

We Aim to also add a peer to peer marketplace powered by smart contract to enable easy exchange of Ethereum Assets for fiat.

GETH WALLET TOKEN (GWT)

Geth Wallet Token (GWT) is the native ERC20 Utility Token for the Geth Wallet. We aim to integrate features in the app that will enable transaction fees to be paid using GWT. Currently we offer listing services for Dapps inside our Dapp explorer and the fees are paid using GWT. During Presale the cost of GWT is $0.10 with a bonus of 50% for the first people to join whitelist.

ROADMAP

1st AUGUST 2019 -31st AUGUST 2019

★**Airdrop Campaign**
